

BELISHA BEACONS

Safety. Confidence. Assurance.

Globes

Our range of Globes are **vandal resistant**.

The Standard Globe:

Having made the mould tool ourselves to our usual high standards we then have the globes rotationally moulded in UV stabilised Borealis Polyethylene. The result of which is a robust product with high impact strength and because of the luminescent compounds a brighter globe!

The globe is held in place by 3no. S/S Hex-Pin Tamper proof screws and with its neoprene seal obtains a rating of IP54.

1 size supplied.

Globes available:

Amber • High Glow Amber • Pearl • High Glow Pearl

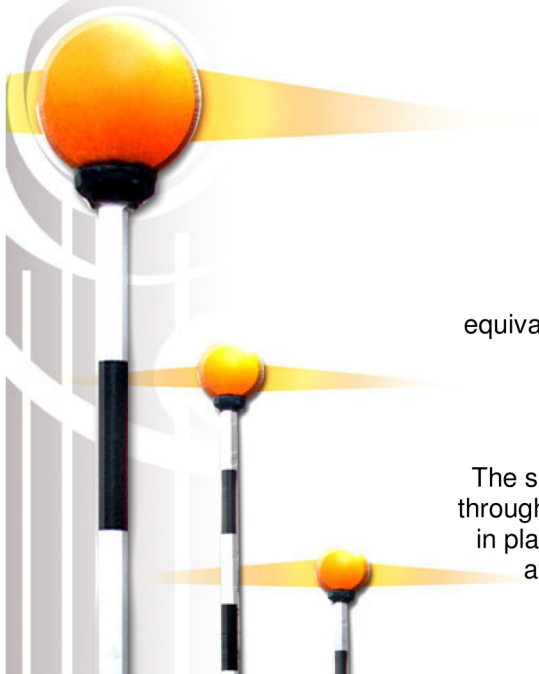

LED Illuminated Globe:

Over 60% saving on running costs over 5 years compared to an equivalent filament beacon. Over 50,000 hours use before replacement is required. Equates to 5 years maintenance free.

Power Consumption is less than 6 Watts.

The solid nylon base is held firmly in place by 4no. stainless steel screws through key hole slots – simply place unit on top of gallery and turn to lock in place. Comes with 4m of 2 core flex for connection to the cut-out. Also available with Amber LED's, much more suited to the Hi-Glow globe.

1 Size Supplied.
